Your Lunar Report 3 months

*** LUNAR RETURN REPORT ***

The Lunar Return is a monthly chart calculated for the time when the Moon returns to the exact position it was in your natal chart. This happens every twenty-eight days; there are thirteen Lunar Returns in a year. These charts mark the principal events of the month for which the return was produced.

This report outlines possible events for that month and also gives some suggestions on how to deal with the positive as well as negative planetary aspects.

In some cases you will find contradictions; a planet may be beneficial in a certain area, while others may indicate the opposite. This means that you could have two types of situations in the same month. For example: a lover's quarrel and a following reconciliation. To get the most out of this report, it will be necessary to use your own logic and intuition, fitting the descriptions outlined here to your own particular case.

The objective of this report is to offer you a practical guide that helps you to analyze this month's perspectives and to benefit from them using your free will. Note that the accuracy of these calculations depends much on how precisely your hour of birth is known.
